

Permissions

- Permissions: To use previously published material from a book or journal, you must obtain written permission from the owner of the rights to the material (the original publisher and/or author). **It is your responsibility** to obtain permission to use copyrighted material. The executed permissions need to be sent along with the manuscript to your volume editor.

Write for permission as early as possible before your manuscript deadline. Publishers may be slow in responding to requests for permission, and it is possible that permission will be denied, or that you will be asked to also obtain the author's permission (in cases where the author controls sole rights, or joint rights with the publisher). In any case, it is in your own best interest to also ask the author of the original publication. If the author is difficult to locate, keep good records of your attempt.

Most publishers offer submission of permission requests online or via email, which may be the fastest and most convenient way of receiving a reply. Some examples with relevant links are:

Elsevier: <http://www.elsevier.com/homepage/guestbook/?form=permis>

Nature: http://www.nature.com/help/reprints_and_permissions/permit_form.html

Springer: <http://www.springer.de/rights/contacts.html>

Science: <http://www.sciencemag.org/subscriptions/permissions.dtl>

IEEE: <http://www.ieee.org>

You may also use the

[Permission Request Form](http://proceedings.aip.org/proceedings/permission.pdf) [<http://proceedings.aip.org/proceedings/permission.pdf>] to request permission to reprint text, tables or figures. You may complete this form and fax it to the publisher or author of the material you wish to use.

When the signed permission is returned to you, **please insert any necessary credit lines** in your figure or table legends.

You do need permission to:

1. Quote verse, either in whole or in part.
2. Reproduce tables, graphs, drawings, and photos, or any copyrighted features that are complete in themselves.

NOTE: The mere *redrawing of an illustration is not enough to make it original*. There must be alterations that are themselves copyrightable. Even when intellectual additions are present, you must obtain permission from the copyright holder to alter the table or illustration.

NOTE: *Acknowledgment* of the source of material does not substitute for *obtained permission* to use the material. Always obtain permission when in doubt.

NOTE: It is a courtesy and it is in your best interest to *notify the original author* of your intention to reproduce his/her material. Many publishers actually require it.

You do not need permission to:

1. Use material from any AIP journal or magazine and also from select publications of constituent societies of AIP (please see the list of publications exempt from need of permission).
2. Use material in the public domain (material that is no longer or never has been protected by copyright, e.g. United States government reports, NASA publications, DOE publications). Note that a work which has passed into the public domain in the United States may still be protected under copyright in other countries. If so, you must obtain permission to use such material in order to enable AIP's worldwide distribution of your work.
3. Include material that falls within the Freedom of Information Act. This would include work done by a U.S. government employee and work published by the U.S. government.
4. Discuss another's *ideas* as long as that person's "literary expression" of the ideas is not used; you must keep in mind that the organization and selection of the material and its sequence are part of the "literary expression." When in doubt, obtain permission.
5. Include material when the use constitutes "fair use," such as quoting or paraphrasing copyrighted material for the purpose of scholarly comment, illustration, or criticism within a limited scope.

AIP AND MEMBER SOCIETIES' JOURNALS WHICH DO NOT REQUIRE PERMISSION REQUESTS

American Institute of Physics

*Applied Physics Letters
 *CHAOS
 *Computers in Physics
 *The Industrial Physicist
